OUR SECRET RECIPE FOR CREATING LIGHT IMAGES

Silva Intelligent Light is a double light beam technology featured in all Silva headlamps. The unique combination of a long reach spotlight and a close flood-light results in less head movement, better control, improved balance, less fatigue and higher speed.

PRESET LIGHT VS. FLEXIBLE FLOW LIGHT

We have headlamps with preset light ideal for running, hiking, map reading, etc. If you want to use your headlamp for multiple activities with different speed, you should choose a headlamp with **Flow Light**, which enables seamless tuning of the light from slow to fast activities.

BURN TIME - THE SHORT EXPLANATION

More cooling = more light, and shorter burn time

Less cooling = less light, and more burn time

At Silva we use the American national standard for lighting systems, **ANSI**, to measure burn time. What burn time actually measures, is the time it takes from when the light is turned on until the light reaches 10% of the start value.

Burn time is affected by different factors such as speed (airflow) and the ambient air temperature and may vary in different conditions because the headlamp needs to cool down to perform. The burn time values in this catalogue are specified with a **span** to take these factors into account.

	True Lumen ANSI	Burn Time ANSI	Light distance ANSI
MAX	900 lm	2.5	130 m
MED	400 lm	4	90 m
MIN	80 lm	15	45 m

Lumen, burn time and light distance are measured according to the [ANSI FL1 STANDARD](#).
Burn time is presented as a span with the lowest and highest value in various conditions.
For more information about ANSI and how different factors affect the burn time and light output;
have a look at our headlamp guide at: www.silvasweden.com

The Free 900 XXS is the latest addition to Silva's modular Free series of headlamps. This 900-lumen headlamp features a slim, flat stow-away battery and a minimalist, adjustable headband, providing a lighter, more comfortable fit ideal for running. The 96g battery can be easily carried in your pocket or running vest and connects to the headband with an integrated textile cord, reducing weight on your head. With its 900-lumen brightness and 11.1 Wh battery, the Free 900 XXS offers the perfect combination of lumen and comfort for an optimal running experience.

/// FEATURES

- 900 lumen light output
- Lightweight and comfortable feel with stow-away battery
